### Abstract of **DE3910183**

What is described is a textile machine, especially ring-spinning machine, with a plurality of electrical drive systems 10, 12 for driving spindles, drawframes, ring rails or the like, which, furthermore, is equipped with a suck-off device 58 having a suck-off fan 20. The suck-off fan 20 is coupled to a generator 22 which is wired to at least some of the drive systems 10, 2 not assigned to the suck-off fan, in order to supply these with electrical energy in the event of a power failure.
